Requests for permission to reproduce or translate WHO publications –whether for sale or for non-commercial distribution– should be addressed to WHO Press through the WHO website (www.who.int/about/licensing/copyright_form/en/index.html).

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the World Health Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted lines on maps represent approximate border lines for which there may not yet be full agreement.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by the World Health Organization in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

All reasonable precautions have been taken by the World Health Organization to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall the World Health Organization be liable for damages arising from its use.

Design and layout by L'IV Com Sàrl, Villars-sous-Yens, Switzerland.

Contents

Acronyms and abbreviations	v
Acknowledgements	vi
Foreword	vii
Executive summary	viii
Methods	viii
Exposures	ix
Impacts of interventions	ix
Global burden of disease	ix
Section 1. Introduction	1
1.1 Disease burden methodology	1
1.1.1 Exposure distribution in the population	1
1.1.2 Exposure-response relationship	2
1.2 Report structure	2
Section 2. Drinking-water	3
2.1 Global access to drinking-water supplies	3
2.2 Faecal contamination of drinking-water supplies	4
2.3 Household water treatment	5
2.4 Drinking-water supplies used in LMICs	6
2.5 Effect of improvements in drinking-water supply on diarrhoeal disease risk	6
2.6 Burden of diarrhoeal disease from inadequate drinking-water	8
2.7 Policy implications	9
Section 3. Sanitation	10
3.1 Global sanitation practices	10
3.2 Sanitation facilities used in LMICs	10
3.3 Effect of improvements in sanitation on diarrhoeal disease risk	11
3.4 Burden of diarrhoeal disease from inadequate sanitation	12
3.5 Policy implications	13
Section 4. Handwashing	14
4.1 Global practices of handwashing with soap	14
4.2 Effect of handwashing with soap on diarrhoeal disease risk	14
4.3 Burden of disease from inadequate handwashing	14
4.4 Policy implications	15

Section 5. Integrated water, sanitation and hygiene interventions	16
5.1 Burden of diarrhoeal disease from inadequate water, sanitation and hygiene.	16
Section 6. Trends, other estimates and non-diarrhoeal WASH-related illness	17
6.1 Trends since 1990	17
6.2 Comparison with previous estimates of diarrhoea attributable to inadequate WASH	17
6.3 Impact on diseases other than diarrhoea	18
6.4 Policy implications	19
Annex	20
Country data on water-, sanitation- and hygiene-related exposure and disease burden.	20
Methodology	20
Notes to Annex Table 2.	20
References	32

Acronyms and abbreviations

CI	Confidence Interval
DALY	Disability-adjusted Life Year
GBD	Global Burden of Disease
HWTS	Household Water Treatment and Safe Storage
IHME	Institute for Health Metrics and Evaluation
JMP	Joint Monitoring Programme for Water Supply and Sanitation
LMICs	Low- and Middle-Income Countries
MDG	Millennium Development Goal
PAF	Population Attributable Fraction
SSP	Sanitation Safety Plan
UNICEF	United Nations Children's Fund
VIP	Ventilated Improved Pit latrine
WASH	Water, Sanitation and Hygiene
WSP	Water Safety Plan
WHO	World Health Organization

Regions of the World Health Organization

AFR	African Region
AMR	Region of the Americas
EMR	Eastern Mediterranean Region
EUR	European Region
SEAR	South-East Asia Region
WPR	Western Pacific Region

Acknowledgements

Many of the results presented in this report are the output of a large group of experts, and include the following:

Professor Jamie Bartram, University of North Carolina at Chapel Hill, USA
Professor Sandy Cairncross, London School of Hygiene and Tropical Medicine, UK
Professor Thomas Clasen, London School of Hygiene and Tropical Medicine, UK and Emory University, USA
Professor Jack Colford, School of Public Health at Berkeley, USA
Dr Oliver Cumming, London School of Hygiene and Tropical Medicine, UK
Dr Valerie Curtis, London School of Hygiene and Tropical Medicine, UK
Dr Alan Dangour, London School of Hygiene and Tropical Medicine, UK
Dr Lorna Fewtrell, Aberystwyth University, UK
Dr Matthew Freeman, Emory University, USA
Professor Paul Hunter, University of East Anglia, UK
Ms Aurelie Jeandron, London School of Hygiene and Tropical Medicine, UK
Dr Daniel Mäusezahl, Swiss Tropical and Public Health Institute and University of Basel, Switzerland
Dr Jennyfer Wolf, Swiss Tropical Institute and University of Basel, Switzerland

Thanks are also due to Dr Lorna Fewtrell for the technical editing of the report.

The WHO Secretariat involved in this project, from the Department of Public Health, Environmental and Social Determinants of Health, included Dr Sophie Bonjour, Ms Jennifer De France, Mr Bruce Gordon, Ms Fiona Gore, Mr Rifat Hossain, Dr Richard Johnston, Dr Colin Mathers, Ms Kate Medicott, Dr Margaret Montgomery, Dr Maria Neira, and Dr Annette Prüss-Üstün.
