● Contents

Acknowledgements	vii
Financial support	vii
Abbreviations	viii
Executive summary	1
Purpose of the guideline	1
Guideline development methodology	1
Available evidence	2
Principles	2
Recommendations	3
Key remarks	6
Research priorities	6
1. Scope and purpose	7
2. Background	7
Nutrition and tuberculosis	8
Macronutrient requirements in active TB	9
Micronutrient requirements in active TB	9
Available guidance for treatment of malnutrition/undernutrition	9
Social determinants of malnutrition and TB	10
TB and pregnancy	10
TB and child household contacts	11
3. Guideline development process	13
Advisory groups	13
Scope of the guideline, evidence appraisal and decision-making	13
Management of conflicts of interest	15
4. Summary of the evidence	16
Optimal composition of the diet for patients receiving treatment for active TB	16
Macronutrient and micronutrient supplementation for patients with active TB	16
Population-level nutritional interventions to reduce the progression from latent to active TB	17
Implications for future research	18

5. Key principles	19
Key principle 1. All people with active TB should receive TB diagnosis, treatment and care according to WHO guidelines and international standards of care	19
Key principle 2. An adequate diet, containing all essential macro- and micronutrients, is necessary for the well-being and health of all people, including those with TB infection or disease	20
Key principle 3. Because of the clear bidirectional causal link between undernutrition and active TB, nutrition screening, assessment and management are integral components of TB treatment and care	20
Key principle 4. Poverty and food insecurity are both causes and consequences of TB, and those involved in TB care therefore play an important role in recognizing and addressing these wider socioeconomic issues.	22
Key principle 5. TB is commonly accompanied by comorbidities such as HIV, diabetes mellitus, smoking and alcohol or substance misuse, which have their own nutritional implications, and these should be fully considered during nutrition screening, assessment and counselling	22
6. Recommendations	23
Nutrition assessment and counselling	23
Management of severe acute malnutrition	23
Management of moderate undernutrition	23
Micronutrient supplementation	24
Contact investigation	24
Remarks	24
7. Dissemination, adaptation and implementation	25
Dissemination	25
Adaptation and implementation	26
8. Plans for updating the guideline	26

References	27
Annex 1 GRADE summary of findings tables	34
Annex 2 Summary of the Nutrition Guidance Advisory Group's considerations for determining the strength of the recommendation	37
Annex 3 Questions in population, intervention, control, outcomes (PICO) format	47
Annex 4 WHO Steering Committee for Nutrition Guidelines Development 2010–2011	51
Annex 5 Nutrition Guidance Advisory Group – nutrition in the life-course 2010–2011, WHO Secretariat and external resource experts	52
Annex 6 External experts' and stakeholders' panel	55

● Acknowledgements

This guideline was coordinated by Dr Maria del Carmen Casanovas and Dr Knut Lönnroth, with technical input from Dr Luz Maria De-Regil, Dr Ernesto Jaramillo, Dr Juan Pablo Peña-Rosas, Mrs Randa Saadeh and Mrs Diana Weil. This work was initiated as part of the general programme of work of the Department of Nutrition for Health and Development, and the Global TB Programme (GTB) in the World Health Organization (WHO) Geneva. We thank Dr Peggy Papathakis, California Polytechnic State University, San Luis Obispo for the initial draft of the document during her sabbatical leave at the Department of Nutrition for Health and Development in Geneva, Switzerland. We are grateful to the WHO Guidelines Review Committee Secretariat staff for their technical support throughout the process, particularly Dr Susan Norris. Thanks are due to Ms Lisa Haintz-Carbonin from the WHO Office of the Legal Counsel, for her support in the management of conflicts of interest procedures and to Ms Grace Rob and Mrs Paule Pillard from the Evidence and Programme Guidance Unit, Department of Nutrition for Health and Development, who provided logistic support for all this work.

WHO gratefully acknowledges the technical input of the members of the WHO Steering Committee for Nutrition Guidelines Development and the Nutrition Guidance Advisory Group, especially the chairs of the meetings related to this guideline: Dr Paul Kelly and Dr David Sinclair. WHO is also grateful to the Cochrane Infectious Diseases Group editorial team and the WHO Collaborating Centre for Evidence Synthesis for Infectious and Tropical Diseases in the Liverpool School of Tropical Medicine, Liverpool, United Kingdom of Great Britain and Northern Ireland, for their support to update and develop the systematic reviews used to inform this guideline.

● Financial support

WHO thanks the Government of Luxembourg, the National Institutes of Health (NIH), the United States Agency for International Development (USAID) and the Bill & Melinda Gates Foundation for financial support for this work. Donors do not fund specific guidelines and do not participate in any decision related to the guideline development process, including the composition of research questions, membership of the guideline groups,
