ACKNOWLEDGEMENTS

This case-study is part of a series of such studies of malaria elimination conducted by the Global Malaria Programme of the World Health Organization (WHO) and the Global Health Group at the University of California, San Francisco. The Global Health Group and the WHO Global Malaria Programme wish to acknowledge the financial support of the Bill & Melinda Gates Foundation in preparing the case-study series.

Ms Allison Tatarsky of the Southern African Malaria Elimination Support Team—a partnership between the Global Health Group and the Clinton Health Access Initiative—in collaboration with Dr Shahina Aboobakar of the Mauritius Ministry of Health and Quality of Life collected and analysed the data and drafted this report.

The authors would like to thank the Honourable Minister of Health of Mauritius, Mr Lormesh Bundhoo, for his support of the Mauritius case-study and its inclusion in the WHO series. We are also grateful to the staff of the Ministry of Health and Quality of Life, particularly the Senior Chief Executive, Mrs R Veerapen, and

Dr TR Nundlall, who contributed valuable time and information during the collection, analysis and documentation of country information for this case-study.

We recognize the contributions of the following individuals who reviewed the report and provided important assistance and feedback: Dr Neerunjun Gopee, Mr Premnath Boolaky and Mr Ambicadutt Bheecarry at the Mauritius Ministry of Health and Quality of Life; Dr Justin M. Cohen and Ms Deepika Kandula of the Clinton Health Access Initiative; Ms Cara Smith Gueye and Dr Roly Gosling of the Global Health Group, University of California, San Francisco; and Dr Rossitza Mintcheva, Dr Aafje Rietveld, Dr Richard Cibulskis and Dr Robert Newman of the WHO Global Malaria Programme.

Finally, we acknowledge the contributions of all people who are not listed above.

The authors remain responsible for any errors and omissions.

ACRONYMS AND ABBREVIATIONS

DDT	dichlorodiphenyltrichloroethane
IRS	indoor residual spraying
