ACKNOWLEDGEMENTS

This case-study is part of a series of malaria elimination case-studies conducted by the World Health Organization (WHO) Global Malaria Programme and the University of California, San Francisco (UCSF), Global Health Group.

The two groups wish to acknowledge the financial support of the Bill & Melinda Gates Foundation in developing the elimination case-studies.

The following institutions and people participated in the collection and analysis of information that is included in this report:

Dr Carlos Brito, former General Director for Health, Ministry of Health, Cape Verde; Dr Antonio Delgado, General Director for Health, Ministry of Health, Cape Verde; Dr Jacqueline Periera, former General Director of Health Services, Ministry of Health, Cape Verde; Dr Julio Monteiro Rodrigues, Director National Malaria Control Programme, Ministry of Health, Cape Verde; the provincial and district staff of the Ministry of Health of Cape Verde; Dr Joana Alves and Dr Ana Paula Arez, Instituto de Higiene e Medicina Tropical, Lisbon, Portugal; and Dr Barrysson Andriamahefazafy, WHO Cape Verde.

Dr Jean-Olivier Guintran, formerly of WHO/AFRO/IST West Africa, prepared the draft manuscript of this case-study; the text was further developed by Dr Aafje Rietveld, Dr Rossitza Kurdova-Mintcheva and Dr Richard Cibulskis of the WHO Global Malaria Programme. The map of Cape Verde Archipelago was drawn by Mr Ryan Williams.

The authors would like to thank the Honourable Mrs Cristina Fontes, Minister of Health of Cape Verde, and her staff for their support and assistance in the development of this case-study.

Cape Verde's renewed efforts towards malaria elimination started in 2007 under former Minister of Health Dr Basilio Mosso Ramos, who included malaria elimination in the 2020 objectives of the National Health Policy. This gave rise to the development of the five-year National Malaria Strategic Plan for Pre-elimination, covering the period 2009–2013, and led to a successful Round 10 application to the Global Fund to Fight AIDS, Malaria and Tuberculosis – “Malaria: a step towards pre-eradication in Cape Verde”. This case-study builds on the information that was generated and collected for these two important documents. The following WHO staff assisted the country in this process: Dr Barrysson Andriamahefazafy, Dr Magaran Bagayoko, Dr Andrea Bosman, Dr Socé Fall, Dr Carolina Gomes Cardoso Da Silva, Dr Jean-Olivier Guintran, Dr Georges Ki-Zerbo, Dr Jo Lines, Dr Shiva Murugasampillay, Dr Aafje Rietveld, Dr Pascal Ringwald, Dr Stephane Tohon, Dr Bokar Toure, Dr Luciano Tuseo and Dr Raman Velayudhan.

The following individuals reviewed the case study and provided important assistance and feedback: Dr Socé Fall, Dr Robert Newman and Mrs Cara Smith Gueye. The authors remain responsible for any errors and omissions.

ACRONYMS AND ABBREVIATIONS

ABER	annual blood examination rate
ACT	artemisinin-based combination therapy
API	annual parasite index
CFR	case-fatality rate
DDT	dichlorodiphenyltrichloroethane
EQAS	External Quality Assessment Scheme
GDP	gross domestic product
GMEP	Global Malaria Eradication Programme
G6PD	glucose-6-phosphate dehydrogenase
IDSR	Integrated Disease Surveillance and Response
IHMT	Instituto de Higiene e Medicina Tropical
IRS	indoor residual spraying
MSP	national malaria strategic plan
NGO	nongovernmental organization
NMCP	national malaria control programme
PCR	polymerase chain reaction
PPP	purchasing power parity (expressed in current international \$)
RDT	rapid diagnostic test
SPR	slide positivity rate
WHO	World Health Organization
