All rights reserved. Publications of the World Health Organization can be obtained from WHO Press, World Health Organization, 20 Avenue Appia, 1211 Geneva 27, Switzerland (tel.: +41 22 791 3264; fax: +41 22 791 4857; e-mail: [bookorders@who.int](mailto:bookorders@who.int)). Requests for permission to reproduce or translate WHO publications – whether for sale or for noncommercial distribution – should be addressed to WHO Press, at the above address (fax: +41 22 791 4806; e-mail: [permissions@who.int](mailto:permissions@who.int)).

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the World Health Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted lines on maps represent approximate border lines for which there may not yet be full agreement.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by the World Health Organization in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

All reasonable precautions have been taken by the World Health Organization to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall the World Health Organization be liable for damages arising from its use.

The  
baseline country survey on  
medical devices was launched in February 2010  
by the WHO Department of Essential Health Technologies.

The main objectives of the survey were to determine the key areas  
which require support for the development or improvement of health technology  
programmes in countries and regions; and to share knowledge and resources among the  
participating countries facilitating decision making on a national, regional and global level.

The results of the baseline country survey on medical devices 2010 inform on the availability of  
specific medical devices, policies, guidelines, standards and services for the assessment, management and  
regulation of medical devices in Member States and Associate Members.

Included in this first edition is the response of 145 Member States that was received in the period between  
March and December 2010.

The information has been processed into a comprehensive database and is displayed in country profiles and maps  
reflecting the global status quo.

To facilitate exchange between countries and communication among relevant stakeholders in general, the  
country profiles include contact details of focal points and national institutions responsible for health technology  
management.

Further statistical analysis is being undertaken and will be available on the WHO medical devices website.

We would like to thank the Ministry of Health authorities, the in-country focal points, the Permanent  
Missions of Member States in Geneva for their collaboration, the regional advisers and their  
support staff, the WHO country offices and all staff in the Diagnostic Imaging and Medical  
Devices unit who contributed to this project; the WHO Web team and the Public  
Health Mapping and GIS programme for their support in information  
processing.
