

FAO/WHO Expert meeting on the application of nanotechnologies in the food and agriculture sectors: potential food safety implica tions Meeting report

FAO/WHO Expert meeting on the application of nanotechnologies in the food and agriculture sectors: potential food safety implications Meeting report

> Food and Agriculture Organization of the United Nations and World Health Organization *Rome 2010*

The designations employed and the presentation of material in this information product do not imply the expression of any opinion whatsoever on the part of the Food and Agriculture Organization of the United Nations or of the World Health Organization concerning the legal or development status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. The mention of specific companies or products of manufacturers, whether or not these have been patented, does not imply that these have been endorsed or recommended by FAO or WHO in preference to others of a similar nature that are not mentioned.

All reasonable precautions have been taken by the World Health Organization and the Food and Agriculture Organization of the United Nations to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied.

The responsibility for the interpretation and use of the material lies with the reader. In no event shall the World Health Organization or the Food and Agriculture Organization of the United Nations be liable for damages arising from its use. This report contains the collective views of an international group of experts and does not necessarily represent the decisions or the stated policy of FAO or of WHO.

- viii Meeting participants
- xii Declaration of interests
- xiii Abbreviations and acronyms
- xv Working definitions
- xvii Executive summary
- xvii Background
- xviii Use of nanotechnology
- xix Assessment of human health risks
- xx Stakeholder confidence and dialogue

3 Introduction

- 3 Background
- 3 Market drivers and scale of commercial activity
- 5 Meeting background
- 6 Scope and objectives
- 6 Scope

6

- Objectives
- 7 Expected outputs
- 8 Existing and projected applications of nanotechnology in the food and agriculture sectors
- 8 Scope and objectives
- 9 Introduction
- 10 Processed nanostructures in food
- 11 Nanodelivery systems based on encapsulation technology
- 12 Nanomaterials relevant to food applications
- 13 Inorganic nanomaterials
- 14 Surface functionalized nanomaterials
- 14 Organic nanomaterials

15	Nano-enabled food contact materials (FCMs) and
	packaging
15	Nanoparticle reinforced materials
17	Intelligent packaging concepts based on nanosensors
18	Use of nanotechnologies in the agriculture sector
18	Animal feed
18	Agrochemicals
19	Future perspectives
19	Introduction
20	Carbon nanotube–polymer composites
20	Polymer nanocomposite films
21	Polymer composites with nano-encapsulated substances
21	Dirt repellent coatings at nanoscale
21	Nanomaterials for next generation packaging
	displays
21	Improvement of the performance of biobased polymers
22	Summary
24	Assessment of human health risks associated with
	the use of nanotechnologies and nanomaterials
	in the food and agriculture sectors
24	Introduction
25	Problem identification
26	Risk assessment: Hazard identification
