IMAI One-day Orientation on Adolescents Living with HIV

This course is part of a global commitment and recognition of the importance of addressing HIV and young people. The Political declaration on HIV/AIDS adopted at the United Nations General Assembly High-Level Meeting on AIDS (June 2006), states (we):

8. *Express grave concern that half of all new HIV infections occur among children and young people under the age of 25, and that there is a lack of information, skills and knowledge regarding HIV/AIDS among young people;*
23. *Reaffirm also that prevention, treatment, care and support for those infected and affected by HIV/AIDS are mutually reinforcing elements of an effective response and must be integrated in a comprehensive approach to combat the pandemic;*
26. *Commit ourselves to addressing the rising rates of HIV infection among young people to ensure an HIV-free future generation through the implementation of comprehensive, evidence-based prevention strategies, responsible sexual behaviour, including the use of condoms, evidence- and skills-based, youth-specific HIV education, mass media interventions and the provision of youth-friendly health services.*

Section 1: _____

Introduction to the IMAI One-day Orientation on Adolescents Living with HIV

1.1 WHO trainings on adolescents and HIV

This one-day course has been developed as an additional optional training for the World Health Organization (WHO) Integrated Management of Adolescent and Adult Illness (IMAI) package, focusing on adolescents living with HIV. The target audience for this training are first-level facility health workers who have attended the WHO IMAI-IMCI [Integrated Management of Childhood Illness] Basic HIV Care with ART and Prevention training course and the WHO IMAI Acute Care training course, and are working with adolescent patients.

There are two WHO training modules to orient health workers to adolescents and young people living with HIV:

PARTICIPANTS COMPLETE THIS TRAINING AND THEN ATTEND THIS TRAINING THAT FOCUSES ON . . .
WHO IMAI-IMCI Basic HIV Care with ART and Prevention training course and WHO IMAI Acute Care training course	IMAI One-day Orientation on Adolescents Living with HIV	Issues for health workers who provide care to adolescents living with HIV
WHO Orientation Programme on Adolescent Health for Health-care Providers	Module N Young People and HIV	HIV prevention needs of young people in general
