Publications of the World Health Organization can be obtained from WHO Press, World Health Organization, 20 Avenue Appia, 1211 Geneva 27, Switzerland (tel.: +41 22 791 3264; fax: +41 22 791 4857; e-mail: [bookorders@who.int](mailto:bookorders@who.int)). Requests for permission to reproduce or translate WHO publications – whether for sale or for noncommercial distribution – should be addressed to WHO Press, at the above address (fax: +41 22 791 4806; e-mail: [permissions@who.int](mailto:permissions@who.int)).

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the World Health Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted lines on maps represent approximate border lines for which there may not yet be full agreement.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by the World Health Organization in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

All reasonable precautions have been taken by the World Health Organization to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall the World Health Organization be liable for damages arising from its use.

Preface	ix
Executive summary	x
Abbreviations	xii
Glossary	xiii
INTRODUCTION	1
1. HEALTH EFFECTS OF RADON	3
1.1 Lung cancer risks in radon-exposed miners	4
1.2 Lung cancer risks in the general population from indoor radon	7
1.3 Radon and diseases other than lung cancer	14
1.4 Burden of lung cancer caused by indoor radon	14
2. RADON MEASUREMENTS	21
2.1 Measurement devices	23
2.2 Measurement protocols	28
2.3 Quality assurance for radon measurements	30
3. RADON PREVENTION AND MITIGATION	41
3.1 Organization of radon prevention and mitigation actions	41
3.2 Radon prevention strategies in new constructions	44
3.3 Radon mitigation strategies in existing buildings	49
4. COST-EFFECTIVENESS OF RADON CONTROL	57
4.1 The framework of cost-effectiveness analysis	58
4.2 Previous economic evaluations of radon prevention and mitigation	62
4.3 Example of a cost-effectiveness analysis	63
5. RADON RISK COMMUNICATION	73
5.1 Fundamentals, strategies and channels	74
5.2 Framing radon risk issues for risk communication	75
5.3 Core messages for radon risk communication	78
5.4 Communication campaigns	79
6. NATIONAL RADON PROGRAMMES	83
6.1 Organization of a national radon programme	84
6.2 National radon surveys	86
6.3 National reference levels	89
6.4 Building regulations and building codes	91
6.5 Identification and remediation of homes with high radon concentrations	91

## **Declaration of interests statement**

All the individuals who participated in the meetings of the International Radon Project were asked to inform WHO if at any time a conflict of interest, whether actual or potential, could be perceived in their work and they were required to sign a conflict of interest statement. There was no conflict of interest for any participants contributed to the preparation of this document.

# Acknowledgements

This Handbook was developed by the Department of Public Health and Environment within the framework of the WHO International Radon Project. It is based on the contribution of more than 100 scientists and radon experts, who participated in several consultation meetings to develop this document. Special thanks are given to all the participants and contributors.

The Handbook has been organized in six main chapters, each drafted by a respective working group of the WHO International Radon Project. In addition, an editorial group was part of the production and reviewing process. WHO is particularly grateful to this group for their assistance and efforts:

Professor William J. Angell  
Dr Francesco Bochicchio  
Dr Susan Conrath  
Professor Sarah C. Darby  
Dr David Fenton  
Professor R. William Field  
Professor Alastair Gray  
Dr Thomas Jung  
Dr Michaela Kreuzer  
Dr Paul McGale  
Professor James McLaughlin  
Dr Kristy Miller  
Professor Terje Strand  
Dr Jan M. Zielinski

WHO also acknowledges the participation of representatives from the International Atomic Energy Agency, the United Nations Scientific Committee on the Effects of Atomic Radiation, the International Commission on Radiological Protection and the European Commission as observers.

WHO thanks Derek Christie, Kelli Donnelly and Florence Samkange-Zeeb for their valuable contributions in reviewing and editing the manuscript.

WHO gratefully acknowledges the US Environmental Protection Agency (USA), the Department of Health (United Kingdom) and the Department of Environment, Heritage and Local Government (Ireland) for providing the main funding for the WHO International Radon Project. It is also indebted to the Federal Office of Radiation Protection (Germany) for its support in organizing meetings in Munich, Bonn and Mainz, as well as to the Federal Office of Public Health (Switzerland) for taking over the printing costs of the handbook.
