CONTENTS

Acknowledgements	vii
Contributors	ix
Foreword	xi
Abbreviations	xiii
Executive Summary	xv
1. Introduction	1
1.1 Background	1
1.2 Objectives	1
1.3 Scope	2
1.4 Introduction to viruses	2
2. Foodborne viral illness – burden of disease and viruses of concern	5
2.1 Identification of foodborne viruses of main concern	5
2.1.1 <i>Hepatitis A (HAV)</i>	6
2.1.2 <i>Norovirus (NoV)</i>	7
2.1.3 <i>Human Rotavirus (HRV)</i>	7
2.1.4 <i>Hepatitis E virus (HEV)</i>	7
2.1.5 <i>Emerging viruses (Nipah virus, Highly Pathogenic Avian Influenza (HPAI) virus, SARS-causing Coronavirus)</i>	7
2.2 Estimating the burden of foodborne viral illness	8
2.3 Data from outbreak reporting	10
3. Routes of transmission and the impact of viral characteristics on their control	13
3.1 Transmission routes	13
3.1.1 <i>Human sewage and faeces</i>	13
3.1.2 <i>Infected food handlers</i>	14
3.1.3 <i>Zoonotic transmission</i>	15
3.2 Impact of virus characteristics on their control	15
3.2.1 <i>Persistence of foodborne viruses</i>	15
3.2.2 <i>Stability of foodborne viruses during processing</i>	16
3.2.3 <i>Decontamination of hands</i>	16
3.2.4 <i>Decontamination of surfaces</i>	17

3.2.5 <i>Difficulties in establishing the impact of control measures on the infectivity of foodborne viruses</i>	17
4. Current status of methodology and its impact on detection and control	19
4.1 Current status of methodology	19
4.2 Challenges in the development of appropriate methodology	19
5. Selection of priority virus commodity combinations and the main sources of contamination	23
5.1 Virus-commodity combinations	23
5.2 Main sources of contamination for priority virus-commodity combinations.	24
5.2.1 <i>NoV and HAV and bivalve molluscan shellfish (including oysters, clams, cockles and mussels)</i>	24
5.2.2 <i>NoV and HAV and fresh produce</i>	24
5.2.3 <i>NoV and HAV and prepared foods</i>	25
5.2.4 <i>HRV and water for food preparation</i>	26
5.2.5 <i>Emerging viruses in selected commodities</i>	26
6. Risk assessment – available knowledge and feasibility	27
6.1 Introduction	27
6.2 Availability of data for risk assessment	27
6.2.1 <i>Hazard identification</i>	27
6.2.2 <i>Exposure assessment</i>	28
6.2.3 <i>Hazard characterization (dose-response)</i>	29
6.3 Existing risk assessments of foodborne viruses	29
6.4 Potential application of risk assessment to foodborne viruses	30
7. Risk management considerations	31
7.1 Introduction	31
7.2 Trade aspects of commodities of concern	31
7.2.1 <i>Bivalve molluscs</i>	31
7.2.2 <i>Fresh produce</i>	32
7.3 Challenges for risk management	32
7.4 Risk management options	34
7.4.1 <i>Bivalve molluscs</i>	34
7.4.2 <i>Fresh produce</i>	35
7.4.3 <i>Handling</i>	35
8. Conclusions and Recommendations	37
8.1 Conclusions	37
8.1.1 <i>Viruses of concern and burden of foodborne viral disease</i>	37

<i>8.1.2 Virus behaviour in food and the environment</i>	37
<i>8.1.3 Routes of transmission</i>	38
<i>8.1.4 Methodology</i>	38
<i>8.1.5 Priority virus-commodity combinations</i>	38
<i>8.1.6 Risk assessment</i>	39
<i>8.1.7 Risk management</i>	39
8.2 Recommendations	40
<i>8.2.1 Viruses of concern and burden of foodborne viral disease</i>	40
<i>8.2.2 Methodology</i>	40
<i>8.2.3 Research</i>	40
<i>8.2.4 Risk assessment</i>	41
<i>8.2.5 Risk management</i>	41
9. Data gaps	43
10. Bibliography	45
Annex 1	53

ACKNOWLEDGEMENTS

The Food and Agriculture Organization of the United Nations (FAO) and the World Health Organization (WHO) would like to express their appreciation to all those who contributed to the preparation of this report through the provision of their time, expertise, data and other relevant information. In particular appreciation is extended to Ingeborg Boxman, Erwin Duizer and Marion Koopmans for their work in preparing the background discussion papers, and to the meeting participants for providing their time and expertise.

The meeting was hosted by the National Institute for Public Health and the Environment (RIVM), Bilthoven, The Netherlands, in collaboration with the Dutch Food and Consumer Product Safety Authority (VWA). FAO and WHO would like to extend their appreciation to Marion Koopmans and Enne De Boer and their staff for their extensive support in the organization and implementation of this meeting, and particularly to Linda Verhoef, RIVM, for acting as a rapporteur for the meeting.

Appreciation is also extended to those who responded to the call for data that was issued by FAO and WHO and in particular to those who provided information that is not readily available in the peer reviewed literature and official documentation.

The preparatory work and expert meeting that led to this report was coordinated by the Secretariat of the Joint FAO/WHO Expert Meetings on Microbiological Risk Assessment (JEMRA). This included Sarah Cahill and Maria de Lourdes Costarrica in FAO, and Peter Karim Ben Embarek and Jenny Bishop in WHO. The work was supported and funded by the Dutch Ministry of Health, Welfare and Sport, and the Ministry of Health, Labor and Welfare, Japan.

Final editing for language and style and preparation for publication was by Thorgeir Lawrence.
