## CONTENTS

Contents	iii
Acknowledgements	vii
Contributors	ix
Foreword	xi
Preparation and purpose of these guidelines	xiii
Abbreviations used in the text	xv
<b>1. Introduction</b>	<b>1</b>
1.1 Background	1
1.2 Exposure Assessment in context	2
1.3 Purpose of the present guidelines	4
1.4 Scope of the guidelines	4
<b>2. The process of exposure assessment</b>	<b>5</b>
2.1 Principles	5
2.2 Purpose and types of exposure assessments	6
2.3 Defining the purpose and scope of a specific exposure assessment	7
2.4 Theory into practice	8
2.5 Resources required for exposure assessment	8
<b>3. Modelling approaches</b>	<b>11</b>
3.1 Introduction	11
3.2 Qualitative and quantitative exposure assessment	11
3.3 Qualitative exposure assessment	12
3.3.1 <i>Potential difficulties with qualitative assessments</i>	12
3.4 Semi-quantitative exposure assessment	13
3.5 Quantitative exposure assessment	13
3.5.1 <i>Deterministic</i>	14
3.5.2 <i>Stochastic</i>	14
3.5.3 <i>Monte Carlo simulation</i>	15
3.5.4 <i>Other model classification schemes</i>	15
3.5.5 <i>Tiered approach to quantitative risk assessment</i>	16
3.6 Modelling the production-to-consumption pathway	16
3.6.1 <i>Introduction</i>	16

3.6.2	<i>Model development</i>	17
3.6.3	<i>Primary production (farm)</i>	18
3.6.4	<i>Processing</i>	20
3.6.5	<i>Post-processing</i>	21
3.7	<b>Consumption</b>	<b>24</b>
3.7.1	<i>Modelling</i>	24
3.7.2	<i>Amount of food consumed</i>	25
3.7.3	<i>Amount per capita vs per eater</i>	25
3.7.4	<i>Amount per year, per day or per eating occasion</i>	25
3.7.5	<i>Importance of characterizing the distribution of contamination</i>	26
3.7.6	<i>Consumption frequency</i>	26
3.7.7	<i>Considerations and challenges in modelling food consumption</i>	27
3.8	<b>Modelling microbial growth and inactivation</b>	<b>28</b>
3.8.1	<i>Introduction</i>	28
3.8.2	<i>Model types and availability</i>	30
3.9	<b>Application of predictive microbiology within exposure assessment</b>	<b>31</b>
3.9.1	<i>Range of model applicability</i>	31
3.9.2	<i>Spoilage flora</i>	32
3.9.3	<i>Sources of variability and uncertainty</i>	32
<b>4.</b>	<b>Data for exposure assessment</b>	<b>35</b>
4.1	<b>Types of data used in exposure assessment</b>	<b>35</b>
4.1.1	<i>Introduction</i>	35
4.1.2	<i>The food product</i>	37
4.1.3	<i>The food chain</i>	37
4.1.4	<i>The microbiological hazard</i>	39
4.1.5	<i>The consumer</i>	41
4.2	<b>Data characteristics</b>	<b>42</b>
4.2.1	<i>Format of the data</i>	43
4.2.2	<i>Level of detail required</i>	43
4.2.3	<i>Presentation of data</i>	44
4.2.4	<i>Homogeneity of data sets, as an aid to comparability</i>	44
4.3	<b>Potential sources of data</b>	<b>44</b>
4.3.1	<i>National surveillance data for foodborne disease</i>	45
4.3.2	<i>Data from analytical epidemiological surveys</i>	45
4.3.3	<i>Data from systematic monitoring</i>	46
4.3.4	<i>Data from primary production surveys</i>	46
4.3.5	<i>Data from industrial sources</i>	47
4.3.6	<i>Data from governmental reports</i>	47

4.3.7 <i>Data from published research</i>	48
4.3.8 <i>Data from unpublished research</i>	48
4.4 Data collection, selection and utilization	49
4.4.1 <i>Data collection</i>	49
4.4.2 <i>Data searching</i>	51
4.4.3 <i>Selection of data</i>	52
4.4.4 <i>Statistical analysis of the data</i>	52
4.4.5 <i>Combining data</i>	53
4.5 Dealing with data gaps and limitations	53
4.5.1 <i>Model restructuring</i>	54
4.5.2 <i>Predictive microbiology</i>	54
4.5.3 <i>Surrogate data</i>	54
4.5.4 <i>Expert opinion</i>	55
<b>5. Variability, uncertainty and sensitivity</b>	<b>57</b>
5.1 Uncertainty and variability in exposure assessment	57
5.1.1 <i>Variability</i>	57
5.1.2 <i>Uncertainty</i>	57
5.1.3 <i>Uncertainty and variability together</i>	58
5.1.4 <i>Second order modelling</i>	59
5.2 Sensitivity analysis and uncertainty analysis	60
5.2.1 <i>Sensitivity analysis</i>	60
5.2.2 <i>Uncertainty analysis</i>	61
<b>6. Assuring exposure assessment quality</b>	<b>63</b>
6.1 Verification and Validation	63
6.1.1 <i>Model utility</i>	64
6.1.2 <i>Model accuracy validation</i>	64
6.2 Quality of Documentation	65
6.3 Peer and public review	66
<b>7. Communication in exposure assessment</b>	<b>67</b>
7.1 Communication during exposure assessment	67
7.2 Presentation and communication of results	67
<b>8. Using the guidelines</b>	<b>69</b>
<b>9. References cited</b>	<b>71</b>

<b>Appendix 1. Example of a qualitative exposure assessment</b>	<b>77</b>
<b>Appendix 2. Potential data sources</b>	<b>85</b>
<b>Appendix 3. Terminology</b>	<b>87</b>
<b>Appendix 4. Probability distributions and stochastic processes</b>	<b>89</b>

## ACKNOWLEDGEMENTS

The Food and Agriculture Organization of the United Nations and the World Health Organization would like to express their appreciation to all those who contributed to the preparation of these guidelines. Special appreciation is extended to the participants at the Seattle workshop for the time and effort that they freely dedicated before, during and after the workshop to the elaboration of these guidelines. Many people provided their time and expertise by reviewing the report and providing their comments and all of these are listed in the following pages. Special appreciation is also extended to Tom Ross and Don Schaffner for the additional assistance they provided in reviewing the feedback received from the review process and revising the text as required.

The risk assessment work was coordinated by the Joint FAO/WHO Secretariat on Risk Assessment of Microbiological Hazards in Foods. This included Sarah Cahill, Maria de Lourdes Costarrica and Jean Louis Jouve (2001–2004) in FAO, and Peter Karim Ben Embarek, Jocelyne Rocourt (2001–2004), Hajime Toyofuku (1999–2004) and Jørgen Schlundt in WHO. During the development of these exposure assessment guidelines, additional support and feedback were provided by Gerald Moy, Department of Food Safety Zoonoses and Foodborne Disease, WHO, and Claudio Almedia, Pan American Institute for Food Protection and Zoonoses. Publication of the guidelines was coordinated by Sarah Cahill. Thorgeir Lawrence was responsible for editing the text for language and preparation for printing and Mary Friel for proofreading.

The preparatory work and the publication was supported and funded by the FAO Nutrition and Consumer Protection Division and the WHO Department for Food Safety, Zoonoses and Foodborne Disease.
