ACKNOWLEDGEMENTS

The midwifery modules have been developed by the World Health Organization (WHO) because of the need for education materials to facilitate the teaching of the midwifery skills required to respond to the major causes of maternal death.

Ms Gaynor Maclean developed the initial draft of the modules and pretested some of the teaching–learning methods in two African countries. Ms Friederike Wittgenstein prepared the field-testing version of the modules, retaining most of the ideas and methods included in the initial draft. Ms Judith O’Heir developed the field-testing protocol, coordinated the field-testing activities in five countries in Africa, Asia and the Pacific, and completed the modules following field-testing. Ms Barbara Kwast, and later Sister Anne Thompson, both midwives of international repute, were responsible as WHO staff members for the nurturing, development, production and ultimately, the dissemination and use of the modules.

WHO gratefully acknowledges the contribution of many individuals and institutions in particular, the International Confederation of Midwives (ICM) and the American College of Nurse-Midwives (ACNM), who were involved in the development, pretesting, refining, field-testing and completion of the modules. Deep appreciation is expressed to individuals in the field-testing countries for the time and effort they devoted to using the field-testing version, and to their invaluable comments for the final version.

This second edition of the midwifery modules has been developed under the auspices of the Making Pregnancy Safer team, with valuable contributions from other colleagues within the Department of Reproductive Health and Research. Layout of the modules was done by Ms Maureen Dunphy and overall administration was carried out by Ms Shamilah Akram. This second edition is being published jointly by WHO and ICM, who would like to thank Ms Betty Sweet and Ms Judith O’Heir for the revision and updating of the modules, all the members of the Strengthening Midwifery Technical Meeting held in Geneva 2001 for their valuable comments, contributions and helpful suggestions for further improvements in finalizing the second edition and IPAS for their comments and assistance with the preparation of the new module on Management of incomplete abortion and post-abortion care, and for kind permission to use their illustrations.

Finally, WHO gratefully acknowledges the financial contributions made in support of this and related activities within the Maternal Health and Safe Motherhood Programme, and later the Making Pregnancy Safer initiative, from the governments of Australia, Italy, Norway, Sweden and Switzerland, the Carnegie Corporation, the Rockefeller Foundation, UNDP, UNICEF, UNFPA, and the World Bank. Financial support for the production of the first edition of the modules was provided by the Carnegie Corporation, the governments of Italy and Japan, and the Swedish International Development Cooperation Authority.

TABLE OF CONTENTS

Introduction	1
Summary of module	12
Getting started	13
Session 1:	
Understanding puerperal sepsis	15
Session 2:	
Avoidable factors	25
Session 3:	
Identifying the problem	35
Session 4:	
Managing puerperal sepsis	61
Session 5:	
Learning clinical skills	85
Session 6:	
Case studies	117
Glossary	125
Appendix: Pre- and post-test questions	146
