Assessment of iodine deficiency disorders and monitoring their elimination

A GUIDE FOR PROGRAMME MANAGERS

Third edition

**World Health
Organization**

WHO Library Cataloguing-in-Publication Data

Assessment of iodine deficiency disorders and monitoring their elimination : a guide for programme managers. – 3rd ed.

1.Iodine – deficiency. 2.Nutrition disorders – prevention and control. 3.Sodium chloride, Dietary – therapeutic use. 4.Nutrition assessment. 5.Nutrition policy – standards. 6.Guidelines. I.World Health Organization.

ISBN 978 92 4 159582 7

(NLM classification: WK 250)

This report contains the collective views of an international group of experts, and does not necessarily represent the decisions or the stated policy of the World Health Organization.

Abbreviations	vi
Preface	vii
1 Introduction	1
1.1 About this manual	1
1.2 Definitions	3
1.3 Monitoring and evaluating IDD control programmes	3
1.4 Indicators described in this manual	4
2 IDD and their control, and global progress in their elimination	6
2.1 The iodine deficiency disorders	6
2.2 Correction of iodine deficiency	8
2.3 Universal salt iodization (USI)	10
2.4 Iodine supplementation	12
2.5 Sustainability	12
2.6 Global progress in the elimination of IDD	14
2.7 Challenges for the future: consolidating the achievement	14
3 Indicators of the salt iodization process	17
3.1 Factors that determine salt iodine content	17
3.2 Determining salt iodine levels	20
3.3 Indicators for monitoring at different levels	22
4 Indicators of impact	28
4.1 Overview	28
4.2 Urinary iodine	28
4.3 Thyroid size	34
4.4 Blood constituents	38
5 Monitoring and evaluation methods	44
5.1 Overview	44
5.2 Monitoring and evaluation of salt iodization programs	44
5.3 Iodine status assessment	47
5.4 Thyroid function assessment	48
5.5 Common monitoring methods	48
5.6 Combined micronutrient deficiency surveys	51

6 Indicators of the sustainable elimination of IDD	52
6.1 With regard to salt iodization	52
6.2 With regard to the population's iodine status	52
6.3 With regard to the programmes	53
6.4 Programme evaluation	54
Annexes	55
Annex 1 Titration method for determining salt iodate and salt iodide content	57
Annex 2 Method for determining thyroid size by ultrasonography	62
Annex 3 Method for measuring urinary iodine using ammonium persulfate (method A)	66
Annex 4 Methodology for selection of survey sites by PPS sampling	69
Annex 5 Summarizing urinary iodine data: a worked example	77
Annex 6 Guidelines to assess IDD national programmes	82
Annex 7 List of Contributors	99
References	94
List of tables	
Table 1 The spectrum of iodine deficiency disorders (IDD)	7
Table 2 Recommended dosages of daily and annual iodine supplementation	12
Table 3 Proportion of population and number of individuals in the general population (all age groups) with insufficient iodine intake by WHO regions during the period between 1994 and 2006, and proportion of households using iodized salt	15
Table 4 Epidemiological criteria for assessing iodine nutrition based on median urinary iodine concentrations of school-age children (≥ 6 years)	33
Table 5 Epidemiological criteria for assessing iodine nutrition based on the median or range in urinary iodine concentrations of pregnant women	33
Table 6 Simplified classification of goitre by palpation	36
Table 7 Epidemiological criteria for assessing the severity of IDD based on the prevalence of goitre in school-age children	37
Table 8 Gender-specific 97th percentile (P97) of thyroid volume (ml) by age and body surface area (BSA) measured by ultrasound in iodine-sufficient 6-12 yr-old children	38

Table 9	Indicators of impact at population level: summary	43
Table 10	Summary of criteria for monitoring progress towards sustainable elimination of IDD as a public health problem	54
Table 11	Selection of communities in El Saba using the PPS method	71
Table 12	Selection of schools using the PPS method	73
Table 13	Selection of schools using the systematic selection method	75
Table 14	Summary of results	78
Table 15	Urinary iodine data in Cameroon schoolchildren following salt iodization	79
Table 16	Summary of salt situation	86
Table 17	Summary of Country Program assessments	88

List of figures

Figure 1	National IDD control programming cycle	9
Figure 2	A monitoring and evaluation system for salt iodization	23
Figure 3	Anatomic description of the thyroid gland	62
Figure 4	Transverse scan	64
Figure 5	Longitudinal scan	64
Figure 6	Frequency table and histogram to show distribution of urinary iodine values after iodization in Cameroon	81
Figure 7	Flow chart for Network Country Review	84

Abbreviations

BSA	Body surface area
HDPE	High-density polyethylene
HIV	Human immunodeficiency virus
ICCIDD	International Council for Control of IDD
IDD	Iodine deficiency disorders
IIH	Iodine-induced hyperthyroidism
IQ	Intelligence quotient
ISO	International Organization for Standardization
LDPE	Low-density polyethylene
LQAS	Lot quality assurance sampling
MICS	Multiple indicator cluster survey
N	Number
P	Percentile
PAMM	Programme Against Micronutrient Malnutrition
ppm	Parts per million
PPS	Proportionate to population size
RTK	Rapid test kits
SD	Standard deviation
SOWC	State of the world's children
T3	Triiodothyronine
T4	Thyroxin
Tg	Thyroglobulin
TGR	Total goitre rate
