Organization**

The World Health Organization was established in 1948 as a specialized agency of the United Nations serving as the directing and coordinating authority for international health matters and public health. One of WHO's constitutional functions is to provide objective and reliable information and advice in the field of human health, a responsibility that it fulfils in part through its extensive programme of publications. The Organization seeks through its publications to support national health strategies and address the most pressing public health concerns of populations around the world. To respond to the needs of Member States at all levels of development, WHO publishes practical manuals, handbooks and training material for specific categories of health workers; internationally applicable guidelines and standards; reviews and analyses of health policies, programmes and research; and state-of-the-art consensus reports that offer technical advice and recommendations for decision-makers. These books are closely tied to the Organization's priority activities, encompassing disease prevention and control, the development of equitable health systems based on primary health care, and health promotion for individuals and communities. Progress towards better health for all also demands the global dissemination and exchange of information that draws on the knowledge and experience of all WHO's Member countries and the collaboration of world leaders in public health and the biomedical sciences. To ensure the widest possible availability of authoritative information and guidance on health matters, WHO secures the broad international distribution of its publications and encourages their translation and adaptation. By helping to promote and protect health and prevent and control disease throughout the world, WHO's books contribute to achieving the Organization's principal objective — the attainment by all people of the highest possible level of health.

The WHO Technical Report Series makes available the findings of various international groups of experts that provide WHO with the latest scientific and technical advice on a broad range of medical and public health subjects. Members of such expert groups serve without remuneration in their personal capacities rather than as representatives of governments or other bodies; their views do not necessarily reflect the decisions or the stated policy of WHO. An annual subscription to this series, comprising about six such reports, costs CHF 168.00/US\$ 106.00 (CHF 128.40/US\$ 115.00 in developing countries). For further information, please contact: WHO Press, World Health Organization, 20 avenue Appia, 1211 Geneva 27, Switzerland (tel. +41 22 791 3264; fax: +41 22 791 4857; e-mail: bookorders@who.int; order on line: <http://www.who.int/bookorders>).

Table of contents

1. Introduction and rationale	1
<i>Bruce Dick, Jane Ferguson, & David A. Ross</i>	
1.1 Background	1
1.2 Young people, HIV/AIDS and the global goals	2
1.3 Priorities for action	4
1.4 Objectives and limitations	5
1.5 Process and methodology	7
1.6 Scope and limitations of the data	9
1.7 Challenges in interpreting the findings and follow up	10
 2. Young people: the centre of the HIV epidemic	 15
<i>Roeland Monasch & Mary Mahy</i>	
2.1 Introduction	16
2.2 Data and methods	17
2.3 Types of epidemics	17
2.4 Progress towards UNGASS commitments	24
2.5 Limitations of the data	34
2.6 Conclusions	35
 3. Overview of effective and promising interventions to prevent HIV infection	 43
<i>Judith D. Auerbach, Richard J. Hayes, & Sonia M. Kandathil</i>	
3.1 Introduction	43
3.2 Interventions to change behaviour	44
3.3 Biomedical interventions: evaluating technologies	51
3.4 Social interventions	58
3.5 Behavioural and social issues in developing and implementing interventions	61
3.6 Conclusion	63
 4. The weight of evidence: a method for assessing the strength of evidence on the effectiveness of HIV prevention interventions among young people	 79
<i>David A. Ross, Danny Wight, Gary Dowsett, Anne Buvé, & Angela I.N. Obasi</i>	
4.1 Introduction	80
4.2 Types of interventions and evidence on effectiveness	81
4.3 Thresholds for strength of evidence needed for widespread implementation	84
4.4 What information do policy-makers need?	88
4.5 Assessing the quality of an intervention	91
4.6 Types of evidence and their relative weight	92
4.7 Conclusion	98

5. The effectiveness of sex education and HIV education interventions in schools in developing countries	103
<i>Douglas Kirby, Angela Obasi, & B.A. Laris</i>	
5.1 Introduction and background	104
5.2 Methods	111
5.3 Findings	117
5.4 Discussion and recommendations	142
 6. Review of the evidence for interventions to increase young people's use of health services in developing countries	
<i>Bruce Dick, Jane Ferguson, Venkatraman Chandra-Mouli, Loretta Brabin, Subidita Chatterjee, & David A. Ross</i>	151
6.1 Introduction	152
6.2 Methods	153
6.3 Findings	158
6.4 Discussion	191
6.5 Conclusions	199
 7. The effectiveness of mass media in changing HIV/AIDS-related behaviour among young people in developing countries	
<i>Jane T. Bertrand & Rebecca Anhang</i>	205
7.1 Introduction	206
7.2 Methods	207
7.3 Findings	226
7.4 Discussion	236
 8. The effectiveness of community interventions targeting HIV and AIDS prevention at young people in developing countries	
<i>Eleanor Maticka-Tyndale & Chris Brouillard-Coyle</i>	243
8.1 Introduction	244
8.2 Methods	244
8.3 Findings	247
8.4 Go, ready, steady, do not go	276
8.5 Conclusions	281
 9. Achieving the global goals on HIV among young people most at risk in developing countries: young sex workers, injecting drug users and men who have sex with men	
<i>Oliver Hoffmann, Tania Boler, & Bruce Dick</i>	287
9.1 Introduction	288
9.2 Methods	289
9.3 Findings	293
9.4 Discussion	306

10. Conclusions and recommendations	317
<i>Jane Ferguson, Bruce Dick, & David A. Ross</i>	
10.1 Introduction	317
10.2 The road to “Steady, Ready, Go”	319
10.3 Results	322
10.4 Discussion	328
10.5 Recommendations	335
 Glossary	 343
 Acknowledgements	 347
