Preface	6
Executive summary	7
Introduction	9

PART ONE: THE CALL FOR ACTION 10

1	Communication can make a contribution to TB control	10
1.1	Improving case detection and adherence	12
1.2	Combating stigma and discrimination	13
1.3	Empowering people and communities affected by TB	15
1.4	Political commitment and securing resources for TB control	17
2	Defining terms: advocacy, communication, social mobilization, capacity building	15
2.1	Communication as an overarching theme	15
2.2	Programme communication to inform and empower	15
2.3	Advocacy to change political agendas	15
2.4	Social mobilization to build partnerships	16
2.5	Capacity building to sustain and multiply health gains	17
3	Evidence and lessons learnt	18
3.1	What is the current evidence for ACSM contribution to TB control?	18
3.2	What lessons have been learnt so far?	18
4	Clear principles underpinning this work	21
4.1	Knowledge is critical	21
4.2	Knowledge is not enough	22
4.3	ACSM must be integral to NTPs	23
4.4	ACSM should be nondiscriminatory and rights-based	23
4.5	ACSM requires a country-led approach, and investment in national and subnational capacity	23

PART TWO: THE FRAMEWORK FOR ACTION 26

5	Framework for action	28
6	Strategic vision and goals	29
6.1	Vision	29
6.2	Goals	29
6.3	Strategic objectives and targets	29
7	A five-point framework	30
7.1	Building national and subnational ACSM capacity	30
7.2	Fostering inclusion of patients and affected communities	34
7.3	Ensuring political commitment and accountability	35
7.4	Fostering country-level ACSM partnerships within the context of NTPs	35
7.5	Learning, adapting and building on good ACSM practices and knowledge exchange	36
8	Monitoring and evaluation	37
9	Links to other development processes	38
9.1	The Global Fund to Fight AIDS, Tuberculosis and Malaria	38
9.2	Other funding sources	38
9.3	National policy processes	39
9.4	HIV/AIDS	39
10	The role of the country-level ACSM subgroup	40
11	The budget and its justification	42

PART THREE: ANNEXES

44

1	Planning models and approaches	46
	Diagnostic and planning tools	50
2	Communication materials and resources	55
	Stop TB Partnership Secretariat list of ACSM documents, products and tools	56
	Initial planning resources	57
	Resources for initial organization	58
	Resources on mapping	60
	Resources for participatory planning and conceptualization	61
	Resources on how to involve partners	62
	Resources for selecting objectives	64
	Resources for developing a communication strategy	66
	Resources for developing a workplan	68
	Resources for consulting a workplan	69
	Resources for developing campaigns	70
	Resources for monitoring and evaluation	72
3	Monitoring and evaluating ACSM for TB control	73
	Assessing social mobilization and communication capacity / Inputs	74
	Assessing delivery of ACSM activities / Outputs	76
4	ACSM budget analysis and justification	84
5	Notes	87
	Endnotes	88

Acknowledgements

This strategic framework was compiled by James Deane and Will Parks. It builds on the work and contributions of many people and is in part a collation from many existing strategic documents and workplans. These have been credited wherever possible. Particular thanks are due to the following individuals: Thad Pennas of the Stop TB Secretariat, who has collated and supported this process with great efficiency as well as producing or editing many documents from which this work is based; Michael Luhan and the many other colleagues from other working groups of the Stop TB Partnership, who gave their time and insights into this exercise; and Silvio Waisbord, who has provided an exceptional amount of analysis underpinning the workplan. It has benefited substantially from the review and input of the Stop TB Partnership Advocacy, Communication and Social Mobilization Subgroup at Country Level, and was approved at a meeting of that group in Mexico City in September 2005.

Advocacy, Communication and Social Mobilization Subgroup at Country Level

(as of September 2005)

Preface

The value of advocacy, communication and social mobilization (ACSM) is becoming increasingly valued in TB control strategies. It is to the credit of the Stop TB Partnership that a new ACSM working group was set up in 2005 to inject greater strategic coherence and urgency to this work. I am honoured to be elected as both the vice-chair of this group and the first Vice-Chair of the ACSM Subgroup at Country Level.

There is an increasing wealth of experience and evidence, including from my country Mexico, demonstrating the value of ACSM in mobilizing political support and leadership for TB control strategies at all levels; in empowering people affected by TB; in improving case detection and boosting treatment adherence; and in tackling stigma.

This document sets out a 10-year strategic framework for ACSM activities and is a key supporting document to the Stop TB Partnership's *Global Plan to Stop TB 2006–2015*. This plan demonstrates a step change in both ambition and innovation in tackling TB, and I believe that the ACSM strategies set out in this framework will play a critical role in supporting the achievement of the Stop TB Partnership objectives.

*Vice-Minister of Health
Mexico
Vice-Chair of the Advocacy, Communication and Social
Mobilization Subgroup at Country Level*

Executive summary

A significant scaling up of advocacy, communication and social mobilization (ACSM) will be needed to achieve the global targets for tuberculosis control as detailed in the Global Plan to Stop TB 2006–2015. In 2005, the ACSM Working Group (ACSM WG) was established as the seventh working group of the Stop TB Partnership to mobilize political, social and financial resources; to sustain and expand the global movement to eliminate TB; and to foster the development of more effective ACSM programming at country level in support of TB control. It succeeded an earlier Partnership Task Force on Advocacy and Communications.

This workplan focuses on those areas where ACSM has most to offer and where ACSM strategies can be most effectively concentrated to help address four key challenges to TB control **at country level**:

- Improving case detection and treatment adherence
- Combating stigma and discrimination
- Empowering people affected by TB
- Mobilizing political commitment and resources for TB.

The workplan supports the ACSM contribution to the Global Plan to Stop TB 2006–2015 and sets out a 10-year strategic framework for country-level ACSM programming that complements strategic work at the global advocacy level designed to exert pressure on governments and other authorities to prioritize TB control.

The workplan is divided into two parts:

Part 1 – the call for action

- describes the key challenges to be addressed:

The vision of this workplan is one where all communities at all levels are empowered to remove the threat of TB to human health. By applying ACSM strategies from health-care settings to households, TB patients are supported and treated effectively with dignity and respect. Furthermore, those most affected by TB will be involved in shaping the response.

Over the next 10 years, this framework aims to establish and develop country-level ACSM as a core component of TB prevention and treatment efforts. The framework has the following goals:

- To provide guidance for Global Plan to Stop TB 2006–2015 goals and targets as these translate into national ACSM initiatives.
- To foster participatory ACSM planning, management and evaluation capacity at regional, national and subnational levels.
- To support and develop strategies to achieve key behavioural and social changes, depending on local context, that will contribute to sustainable increases in TB case detection and cure rates.

The following strategic objectives have been identified:

- By 2008, at least 10 endemic countries will have developed and will be implementing multisectoral, participatory ACSM initiatives and generating qualitative and quantitative data on ACSM's contribution to TB control.
- By 2010, at least 20 priority countries will be implementing multisectoral, participatory-based ACSM initiatives, and monitoring and evaluating their outcomes.
- By 2015, multisectoral, participatory ACSM methodologies will be a fully developed component of the Stop TB
