World Health Organization, 1999

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that this is crucial for ensuring transparency and accountability in the organization's operations.

2. Key Objectives and Goals

The primary objectives of this initiative are to streamline the reporting process, reduce the risk of errors, and improve the overall efficiency of the data collection and analysis. By implementing these measures, the organization aims to achieve a more robust and reliable system for monitoring and evaluating its performance.

3. Implementation Strategy

The implementation strategy involves a phased approach, starting with a pilot program in selected departments. This will allow for the identification of potential challenges and the refinement of the process before a full-scale rollout across the entire organization.

Contents

About the Authors	v
Preface	vii
1. Background	1
1. 1 Introduction	
1. 2 Purpose and scope of the study	
1. 3 Methodology	
1. 4 Previous WHO studies and reports	
1. 5 United Nations General Assembly Political Declaration and Global Programme of Action for international cooperation in the control of drug abuse and illicit trafficking in narcotic drugs and psychotropic substances	
2. Recent developments	21
