INTERNATIONAL PROGRAMME ON CHEMICAL SAFETY

BASIC ANALYTICAL TOXICOLOGY

Published by the World Health Organization in collaboration with the United Nations Environment Programme and the International Labour Organisation The World Health Organization is a specialized agency of the United Nations with primary responsibility for international health matters and public health. Through this organization, which was created in 1948, the health professions of some 190 countries exchange their knowledge and experience with the aim of making possible the attainment by all citizens of the world by the year 2000 of a level of health that will permit them to lead a socially and economically productive life.

By means of direct technical cooperation with its Member States, and by stimulating such cooperation among them, WHO promotes the development of comprehensive health services, the prevention and control of diseases, the improvement of environmental conditions, the development of human resources for health, the coordination and development of biomedical and health services research, and the planning and implementation of health programmes.

These broad fields of endeavour encompass a wide variety of activities, such as developing systems of primary health care that reach the whole population of Member countries; promoting the health of mothers and children; combating malnutrition, controlling malaria and other communicable diseases including tuberculosis and leprosy; coordinating the global strategy for the prevention and control of AIDS; having achieved the eradication of smallpox, promoting mass immunization against a number of other preventable diseases; improving mental health; providing safe water supplies; and training health personnel of all categories.

Progress towards better health throughout the world also demands international cooperation in such matters as establishing international standards for biological substances, pesticides and pharmaceuticals; formulating environmental health criteria; recommending international nonproprietary names for drugs; administering the International Health Regulations; revising the International Statistical Classification of Diseases and Related Health Problems and collecting and disseminating health statistical information.

Reflecting the concerns and priorities of the Organization and its Member States, WHO publications provide authoritative information and guidance aimed at promoting and protecting health and preventing and controlling disease.

Introduction							
1. Apparatus and reagents							
	1.1	Apparatus				1	
	1.2	Reference compound	ds and	reagents	5	3	
2.	2. Clinical aspects of analytical toxicology						
	2.1	Diagnosis of acute poisoning					
	2.2	Treatment of acute poisoning					
	2.3	The role of the clini	ical tox	cicology	laboratory	10	
3.	3. General laboratory findings in clinical toxicology						
	3.1	Biochemical tests	U		0.	13	
	3.2	Haematological test	s			17	
4.	Prac	tical aspects of ana	lytical	toxicol	ogy	19	
	4.1	.1 Laboratory management and practice					
	4.2	Colour tests					
	4.3	Pretreatment of samples					
	4.4	Thin-layer chromatography					
	4.5 Ultraviolet and visible spectrophotometry						
5.	Qua	litative tests for po	isons			34	
	5.1 Collection, storage and use of specimens						
	5.2	Analysis of urine, stomach contents and scene residues					
6. Monographs – analytical and toxicological data 59							
	6.1	Amfetamine	59	6.2	Aminophenazone	60	
	6.3	Amitriptyline	61	6.4	Aniline	62	
	6.5	Antimony	64	6.6	Arsenic	65	
	6.7	Atenolol	69	6.8	Atropine [.]	70	
	6.9	Barbiturates	71	6.10	Barium	75	
	6.11	Benzodiazepines	77	6.12	Bismuth	82	
	6.13	Borates	83	6.14	Bromates	85	
	6.15	Bromides	87	6.16	Cadmium	90	
	6.17	Caffeine	90	6.18	Camphor	91	

Contents

6.19	Carbamate pesticides	92	6.20	Carbamazepine	93
6.21	Carbon disulfide	94	6.22	Carbon monoxide	96
6.23	Carbon		6.24	Chloral hydrate	101
	tetrachloride	100			
6.25	Chloralose	102	6.26	Chlorates	104
6.27	Chloroform	105	6.28	Chlorophenoxy	
				herbicides	106
6.29	Chloroquine	108	6.30	Cholinesterase	
	-			activity	109
6.31	Clomethiazole	110	6.32	Cocaine	111
6.33	Codeine	112	6.34	Copper	113
6.35	Coumarin		6.36	Cyanide	117
	anticoagulants	115			
6.37	Dapsone	121	6.38	Dextropropoxy-	
				phene	123
6.39	Dichloral-		6.40	Dichloromethane	125
	phenazone	124			
6.41	Digoxin and		6.42	Dinitrophenol	
	digitoxin	125		pesticides	127
6.43	Diphenhydramine	129	6.44	Diquat	130
6.45	Ephedrine	131	6.46	Ethanol	131
6.47	Ethchlorvynol	134	6.48	Ethylene glycol	135
6.49	Fluoride	136	6.50	Fluoroacetate	139
6.51	Formaldehyde	140	6.52	Formic acid and	
				formate	141
6.53	Glutethimide	143	6.54	Glyceryl trinitrate	144
6.55	Haloperidol	146	6.56	Hydroxybenzonitrile	
				herbicides	146
6.57	Hypochlorites	148	6.58	Imipramine	150
6.59	Iodates	151	6.60	Iodine and iodide	153
6.61	Iron	155	6.62	Isoniazid	157
6.63	Laxatives	158	6.64	Lead	161
6.65	Lidocaine	162	6.66	Lithium	163
6.67	Meprobamate	164	6.68	Mercury	166
6.69	Methadone	168	6.70	Methanol	169
6.71	Methaqualone	170	6.72	Methyl bromide	171
6.73	Morphine	174	6.74	Nicotine	177
6.75	Nitrates	179	6.76	Nitrites	179
6.77	Nitrobenzene	182	6.78	Nortriptyline	183
6.79	Organochlorine		6.80	Organophosphorus	
	pesticides	184		pesticides	186
6.81	Orphenadrine	189	6.82	Oxalates	190
6.83	Paracetamol	192	6.84	Paraquat	195
6.85	Pentachloro-		6.86	Peroxides	198
