# WHO Expert Committee on Biological Standardization

Geneva, 22–29 October 1991

## Members

- Dr D.H. Calam, Head, Chemistry Division, National Institute for Biological Standards and Control, Potters Bar, Herts., England (Rapporteur)
- Professor E. M. Essien, Director, National Institute for Medical Research, Yaba, Lagos, Nigeria
- Dr J. Furesz, Director, Bureau of Biologics, Ottawa, Ontario, Canada
- Professor I. Gust, Director, Research and Development, CSL Ltd., Victoria, Australia (Chairman)
- Dr Z. Khan, Principal Scientific Officer, Quality Control Division, National Institute of Health, Islamabad, Pakistan
- Mr J. Lyng, Head, Laboratory of Biological Standardization, State Serum Institute, Copenhagen, Denmark
- Professor N. V. Medunitsin, Director, Tarasevich State Institute for the Standardization and Control of Medical Biological Preparations, Moscow, USSR (Vice-chairman)
- Dr H. Mirchamsy, Associate Director, Razi State Institute of Sera and Vaccines, Teheran, Islamic Republic of Iran
- Dr W. W. Wright, Senior Scientist, Drug Standards Division, United States Pharmacopeia, Rockville, MD, USA
- Mr Zhou Hai-jun, Director, National Institute for the Control of Pharmaceutical and Biological Products, Beijing, China

## Representatives of other organizations

- Council of Europe
- Mr J.-M. Spieser, European Pharmacopoeia Commission, Council of Europe, Strasbourg, France
- International Federation of Pharmaceutical Manufacturers Associations (IFPMA)
- Dr H.-G. Lehmann, IFPMA, Geneva, Switzerland

## Secretariat

- Dr E. Esber, Associate Director for Research and Regulatory Coordination, Center for Biologics Evaluation and Research, Food and Drug Administration, Bethesda, MD, USA (Temporary Adviser)
- Dr D. Magrath, Chief, Biologicals, WHO: Geneva, Switzerland (Secretary)
- Dr P. L. Storrington, Scientist, Department of Endocrinology, National Institute for Biological Standards and Control, Potters Bar, Herts., England (Temporary Adviser)
- Dr W. G. van Aken, Medical Director, Central Laboratory of the Netherlands Red Cross Blood Transfusion Service, Amsterdam, Netherlands (Temporary Adviser)
- Dr H. J. M. van de Donk, Head, Control of Bacterial Vaccines, National Institute of Public Health and Environmental Protection, Bilthoven, Netherlands (Temporary Adviser)

## **Introduction**

The WHO Expert Committee on Biological Standardization met in Geneva from 22 to 29 October 1991. The meeting was opened on behalf of the Director-General by Dr Hu Ching-Li, Assistant Director-General.

Dr Hu emphasized the importance of the biological standardization programme for countries with developing health programmes and stressed the need for the Committee, in making recommendations, to take account of the procedures essential for assuring the safety and efficacy of biological products, but to avoid specifying unnecessarily stringent or restrictive conditions.

## **General**

### **Good manufacturing practices for biological products**

The Committee noted that the WHO Secretariat had prepared a document entitled "Good manufacturing practice for biological products" (BS/91.1656),<sup>1</sup> intended to provide guidance for biological products supplementary to that given in the more general "Good manufacturing practices for pharmaceutical products" (WHO Technical Report Series, No.823, 1992, Annex 1). After making some modifications to the draft text, the Committee agreed that the document should be annexed to its report (Annex 1).

### **Distribution of International Biological Standards and Reference Reagents**

The Committee noted the distribution of international reference materials by the four main International Laboratories for Biological Standards during 1990 (Table 1) (BS/91.1677). It noted a slight decline in the number of standards distributed by comparison with 1989 (WHO Technical Report Series, No.814, 1991, p.3) and requested that for distributions made during 1991 a more detailed analysis by product category be provided. The Committee also requested the WHO Secretariat to obtain similar information on the distribution of international reference materials held and distributed on behalf of WHO by other cooperating laboratories.

The Committee was informed that, in accordance with the request made in

South-East Asia	7	132	599	9	747	5.6
Western Pacific	84	123	258	13	478	3.6
<b>Total</b>	2 868	2 292	8 089	176	13 425	

<sup>a</sup> Central Laboratory of the Netherlands Red Cross Blood Transfusion Service, Amsterdam, Netherlands: items distributed during the calendar year 1990. State Serum Institute, Copenhagen, Denmark: items distributed during the calendar year 1990. National Institute for Biological Standards and Control, Potters Bar, Herts., England: items distributed between 1 March 1990 and 30 April 1991. Central Veterinary Laboratory, Weybridge, Surrey, England: items distributed during the calendar year 1990.

its forty-first report (WHO Technical Report Series, No.814, 1991, p. 2), the WHO Secretariat had obtained some information on the ways in which international reference materials were used. Many users had stressed the key role played by international reference materials in harmonizing the quality of biologicals at both national and international levels. The Committee emphasized that standardization and control of biologicals could not be fully achieved without the provision of internationally accepted reference materials, and that in the present era of vanishing borders and increased demands for international harmonization, the role of international biological reference materials was even more important
