

# GUIDELINES FOR DRINKING-WATER QUALITY

Vol. 2. Health Criteria and Other  
Supporting Information

WORLD HEALTH ORGANIZATION

The World Health Organization is a specialized agency of the United Nations with primary responsibility for international health matters and public health. Through this organization, which was created in 1948, the health professions of some 160 countries exchange their knowledge and experience with the aim of making possible the attainment by all citizens of the world by the year 2000 of a level of health that will permit them to lead a socially and economically productive life.

By means of direct technical cooperation with its Member States, and by stimulating such cooperation among them, WHO promotes the development of comprehensive health services, the prevention and control of diseases, the improvement of environmental conditions, the development of health manpower, the coordination and development of biomedical and health services research, and the planning and implementation of health programmes.

These broad fields of endeavour encompass a wide variety of activities, such as developing systems of primary health care that reach the whole population of Member countries; promoting the health of mothers and children; combating malnutrition; controlling malaria and other communicable diseases including tuberculosis and leprosy; having achieved the eradication of smallpox, promoting mass immunization against a number of other preventable diseases; improving mental health; providing safe water supplies; and training health personnel of all categories.

Progress towards better health throughout the world also demands international cooperation in such matters as establishing international standards for biological substances, pesticides and pharmaceuticals; formulating environmental health criteria; recommending international nonproprietary names for drugs; administering the International Health Regulations; revising the International Classification of Diseases, Injuries, and Causes of Death; and collecting and disseminating health statistical information.

Further information on many aspects of WHO's work is presented in the Organization's publications.

# CONTENTS

	Page
Preface . . . . .	vii
<b>PART I. MICROBIOLOGICAL ASPECTS</b>	
<b>1. The bacteriological quality of drinking-water . . . . .</b>	<b>3</b>
1.1 Waterborne bacterial pathogens . . . . .	3
1.2 Rationale for the use of indicator organisms . . . . .	4
1.3 Nuisance organisms . . . . .	9
1.4 Disinfection . . . . .	10
1.5 Collection, storage and transport of water samples for bacteriological examination . . . . .	12
1.6 Recommended methods for the detection and enumeration of organisms indicative of pollution . . . . .	15
References . . . . .	29
<b>2. The virological quality of drinking-water . . . . .</b>	<b>32</b>
2.1 General description . . . . .	32
2.2 Routes of exposure . . . . .	32
2.3 Health effects . . . . .	33
2.4 Rationale for recommendation . . . . .	33
2.5 Methods of examination for viruses . . . . .	34
2.6 Interpretation and evaluation of positive findings . . . . .	35
References . . . . .	35
<b>PART II. BIOLOGICAL ASPECTS</b>	
<b>1. Protozoa . . . . .</b>	<b>39</b>
<b>2. Helminths . . . . .</b>	<b>46</b>
2.1 Group I ( <i>Dracunculus, Spirometra</i> ) . . . . .	46
2.2 Group II ( <i>Schistosoma, Ancylostoma, Necator</i> ) . . . . .	49
2.3 Group III ( <i>Ascaris, Trichuris, Strongyloides, Enterobius,</i> <i>Fasciolids, Hymenolepis, Echinococcus</i> ) . . . . .	51
<b>3. Free-living organisms . . . . .</b>	<b>53</b>
References . . . . .	56

### PART III. HEALTH-RELATED INORGANIC CONSTITUENTS

1. Arsenic . . . . .	63
2. Asbestos . . . . .	68
3. Barium . . . . .	76
4. Beryllium . . . . .	80
5. Cadmium . . . . .	84
6. Chromium . . . . .	91
7. Cyanide . . . . .	97
8. Fluoride . . . . .	100
9. Hardness . . . . .	106
10. Lead . . . . .	111
11. Mercury . . . . .	120
12. Nickel . . . . .	124
13. Nitrate and nitrite . . . . .	128
14. Selenium . . . . .	135
15. Silver . . . . .	141
16. Sodium . . . . .	145

### PART IV. HEALTH-RELATED ORGANIC CONSTITUENTS

1. Chlorinated alkanes . . . . .	155
1.1 Carbon tetrachloride . . . . .	155
1.2 1,2-Dichloroethane . . . . .	159
2. Chlorinated ethenes . . . . .	162
2.1 Vinyl chloride . . . . .	162
2.2 1,1-Dichloroethene . . . . .	166
2.3 Trichloroethene . . . . .	170
2.4 Tetrachloroethene . . . . .	176
3. Polynuclear aromatic hydrocarbons . . . . .	182
4. Pesticides . . . . .	190
4.1 DDT (total isomers) . . . . .	191
4.2 Aldrin and dieldrin . . . . .	194
4.3 Chlordane . . . . .	197
4.4 Hexachlorobenzene . . . . .	203
4.5 Heptachlor and heptachlor epoxide . . . . .	208

4.6	Lindane	212
4.7	Methoxychlor	217
4.8	2,4-Dichlorophenoxyacetic acid	218
5.	<b>Chlorobenzenes.</b>	221
5.1	Chlorobenzene (monochlorobenzene)	222
5.2	Dichlorobenzenes.	224
6.	<b>Benzene and lower alkyl benzenes</b>	229
7.	<b>Phenol and chlorophenols.</b>	233
7.1	Chlorinated phenols of toxicological significance	233
7.2	2,4,6-Trichlorophenol.	236
7.3	Pentachlorophenol.	237
8.	<b>Trihalomethanes.</b>	240

## PART V. AESTHETIC CONSTITUENTS AND CHARACTERISTICS

1.	<b>Aluminium</b>	249
2.	<b>Chloride</b>	253
3.	<b>Colour</b>	256
4.	<b>Copper</b>	262
5.	<b>Hardness</b>	264
6.	<b>Hydrogen sulfide.</b>	268
7.	<b>Iron</b>	272
8.	<b>Manganese</b>	275
9.	<b>Oxygen, dissolved.</b>	279
10.	<b>pH level.</b>	281
11.	<b>Sodium.</b>	286
12.	<b>Sulfate.</b>	290
13.	<b>Taste and odour.</b>	293
13.1	Taste	293
13.2	Odour	297
14.	<b>Temperature</b>	301
15.	<b>Total dissolved solids</b>	304
16.	<b>Turbidity</b>	307
17.	<b>Zinc.</b>	313

## PART VI. RADIOACTIVE MATERIALS

<b>1. Introduction</b> .....	319
<b>2. Basic considerations</b> .....	320
2.1 Dose-response relationship .....	320
2.2 Dose-equivalent limits .....	321
2.3 Implications for drinking-water quality .....	322
<b>3. Sources of radiation exposure</b> .....	322
<b>4. Guideline value for gross alpha and gross beta activity</b> ..	323
<b>5. Radon</b> .....	325
References .....	325
Index .....	327
