Publications of the World Health Organization enjoy copyright protection in accordance with the provisions of Protocol 2 of the Universal Copyright Convention. For rights of reproduction or translation of WHO publications, in part or *in toto*, application should be made to the Office of Publications, World Health Organization, Geneva, Switzerland. The World Health Organization welcomes such applications.

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the World Health Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by the World Health Organization in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

## CONTENTS

### ENVIRONMENTAL HEALTH CRITERIA FOR ARSENIC

#### 1. SUMMARY AND RECOMMENDATIONS FOR FURTHER RESEARCH

##### 1.1. Summary

##### 1.1.1. Properties, uses, and analytical procedures

1.1.1.1 Properties and uses

1.1.1.2 Analytical procedures

##### 1.1.2. Environmental transport and distribution

##### 1.1.3. Exposure

##### 1.1.4. Metabolism

##### 1.1.5. Normal levels in man and biological indicators of exposure

##### 1.1.6. Effects and evaluation of health risks

1.1.6.1 Inorganic arsenic compounds

1.1.6.2 Organic arsenic compounds

##### 1.2. Recommendations for further research

##### 1.2.1. Sampling and determination

##### 1.2.2. Exposure

##### 1.2.3. Metabolism and indicators of exposure

##### 1.2.4. Effects

#### 2. PROPERTIES AND ANALYTICAL PROCEDURES

##### 2.1. Chemical and physical properties of arsenic compounds

##### 2.1.1. Inorganic arsenic compounds

##### 2.1.2. Organic arsenic compounds

##### 2.2. Analytical procedures

##### 2.2.1. Sampling and sample treatment

2.2.1.1 Natural waters

2.2.1.2 Air

2.2.1.3 Biological materials

##### 2.2.2. Analytical methods

2.2.2.1 Methods for total arsenic

2.2.2.2 Analyses for specific arsenic compounds

#### 3. SOURCES AND OCCURRENCE OF ARSENIC IN THE ENVIRONMENT

##### 3.1. Natural occurrence

##### 3.1.1. Rocks, soils, and sediments

##### 3.1.2. Air

##### 3.1.3. Water

##### 3.1.4. Biota

##### 3.2. Industrial production and uses of arsenic

##### 3.2.1. Industrial production

##### 3.2.2. Uses of arsenic compounds

##### 3.2.3. Sources of environmental pollution

#### 4. ENVIRONMENTAL TRANSPORT AND DISTRIBUTION

##### 4.1. General

##### 4.2. Aquatic systems

##### 4.3. Air-soil systems

#### 5. LEVELS OF EXPOSURE TO ARSENIC AND ITS COMPOUNDS

##### 5.1. General population exposure through air, drinking water, food, and beverages

##### 5.1.1. Air

##### 5.1.2. Drinking water

##### 5.1.3. Food and beverages

##### 5.1.4. Tobacco

5.1.5. Drugs

5.1.6. Total daily intake in the general population

5.2. Occupational exposure

6. METABOLISM OF ARSENIC

6.1. Inorganic arsenic

6.1.1. Absorption

- 6.1.1.1 Respiratory deposition and absorption
  - 6.1.1.1.1 Animals
  - 6.1.1.1.2 Man
- 6.1.1.2 Gastrointestinal absorption
  - 6.1.1.2.1 Animals
  - 6.1.1.2.2 Man
- 6.1.1.3 Skin absorption
  - 6.1.1.3.1 Animals
  - 6.1.1.3.2 Man
- 6.1.1.4 Placental transfer
  - 6.1.1.4.1 Animals
  - 6.1.1.4.2 Man

6.1.2. Distribution in organisms

- 6.1.2.1 Fate of arsenic in blood
  - 6.1.2.1.1 Animals
  - 6.1.2.1.2 Man
- 6.1.2.2 Tissue distribution
  - 6.1.2.2.1 Animals
  - 6.1.2.2.2 Man

6.1.3. Elimination

- 6.1.3.1 Animals
- 6.1.3.2 Man

6.1.4. Biotransformation

- 6.1.4.1 Animals
- 6.1.4.2 Man

6.2. Organic arsenic compounds

6.2.1. Absorption

- 6.2.1.1 Respiratory absorption
  - 6.2.1.1.1 Animals
  - 6.2.1.1.2 Man
- 6.2.1.2 Gastrointestinal absorption
  - 6.2.1.2.1 Animals
  - 6.2.1.2.2 Man
- 6.2.1.3 Skin absorption
- 6.2.1.4 Placental transfer
  - 6.2.1.4.1 Animals
  - 6.2.1.4.2 Man

6.2.2. Distribution in organisms

- 6.2.2.1 Fate of organic arsenic in blood
  - 6.2.2.1.1 Animals
  - 6.2.2.1.2 Man
- 6.2.2.2 Tissue distribution of organic arsenic
  - 6.2.2.2.1 Animals
  - 6.2.2.2.2 Man

6.2.3. Elimination

- 6.2.3.1 Animals
- 6.2.3.2 Man

6.2.4. Biotransformation

- 6.2.4.1 Animals
- 6.2.4.2 Man

7. NORMAL LEVELS IN MAN AND BIOLOGICAL INDICATORS OF EXPOSURE

7.1. Blood

7.2. Urine

[7.3. Hair](#)

[7.4. Other tissues](#)

[8. EFFECTS AND DOSE-RESPONSE RELATIONSHIPS OF INORGANIC ARSENIC](#)

[8.1. Acute and subacute effects after short-term exposure](#)

[8.1.1. Man](#)

[8.1.2. Animals](#)

[8.2. Effects on reproduction and teratogenicity](#)

[8.2.1. Man](#)

[8.2.2. Animals](#)

[8.3. Noncarcinogenic effects after long-term exposure and sequelae of short-term exposure to inorganic arsenic](#)

[8.3.1. Effects on the respiratory system](#)

8.3.1.1 Man

8.3.1.2 Animals

[8.3.2. Effects on skin](#)

8.3.2.1 Man

8.3.2.2 Animals

[8.3.3. Effects on the liver](#)

8.3.3.1 Man

8.3.3.2 Animals

[8.3.4. Effects on the cardiovascular system](#)

8.3.4.1 Man

8.3.4.2 Animals

[8.3.5. Effects on the nervous system](#)

8.3.5.1 Man

8.3.5.2 Animals

[8.3.6. Effects on other organs](#)

8.3.6.1 Man

8.3.6.2 Animals

[8.4. Carcinogenicity](#)

[8.4.1. Man](#)

8.4.1.1 Cancer of the respiratory system

8.4.1.2 Cancer of the skin

8.4.1.3 Cancer of the liver

8.4.1.4 Leukaemia and tumours of the haematopoietic system

8.4.1.5 Cancer of other organs

[8.4.2. Experimental animal studies](#)

8.4.2.1 Cancer of the respiratory system

8.4.2.2 Skin application

8.4.2.3 Oral administration

8.4.2.4 Other experimental systems

[8.5. Mutagenicity](#)

[8.6. Mechanisms of toxicity](#)

[9. EFFECTS AND DOSE-RESPONSE RELATIONSHIPS OF ORGANIC ARSENIC COMPOUNDS](#)

[9.1. Acute and chronic toxicity](#)

[9.1.1. Man](#)

[9.1.2. Animals](#)

[9.2. Teratogenicity](#)

[9.3. Carcinogenicity](#)

[9.3.1. Animals](#)

[9.4. Mutagenicity](#)

[9.5. Mechanisms of toxicity](#)

[10. INTERACTIONS WITH OTHER CHEMICALS](#)

[10.1. Thiol-compounds](#)

[10.2. Selenium](#)

### 10.3. Cadmium and lead

## 11. EVALUATION OF HEALTH RISKS TO MAN FROM EXPOSURE TO ARSENIC

### 11.1. Introduction

### 11.2. Exposure

### 11.3. Inorganic arsenic compounds

#### 11.3.1. Acute and subacute effects after short-term exposure

#### 11.3.2. Noncarcinogenic effects after long-term exposure and sequelae of short-term exposure

##### 11.3.2.1 Skin effects

##### 11.3.2.2 Cardiovascular effects

##### 11.3.2.3 Neurological effects

#### 11.3.3. Carcinogenicity

##### 11.3.3.1 Cancer of the respiratory system

##### 11.3.3.2 Skin cancer

### 11.4. Organic arsenic compounds

### 11.5. Assessment of the cancer risk for man from exposure to inorganic arsenic

## NOTE TO READERS OF THE CRITERIA DOCUMENTS

While every effort has been made to present information in the criteria documents as accurately as possible without unduly delaying their publication, mistakes might have occurred and are likely to occur in the future. In the interest of all users of the environmental health criteria documents, readers are kindly requested to communicate any errors found to the Division of Environmental Health, World Health Organization, Geneva, Switzerland, in order that they may be included in corrigenda which will appear in subsequent volumes.

In addition, experts in any particular field dealt with in the criteria documents are kindly requested to make available to the WHO Secretariat any important published information that may have inadvertently been omitted and which may change the evaluation of health risks from exposure to the environmental agent under examination, so that the information may be considered in the event of updating and re-evaluation of the conclusions contained in the criteria documents.

## WHO TASK GROUP ON ENVIRONMENTAL HEALTH CRITERIA FOR ARSENIC

### *Members*

Dr R. Albert, Institute of Environmental Medicine, New York University Medical Center, New York, NY, USA (*Chairman of Subgroup 2*)

Dr V. Bencko, Department of General and Environmental Hygiene, Medical Faculty of Hygiene, Charles University, Prague, Czechoslovakia

Dr G. Corey, Department of Environment Programs, Ministry of Health, Santiago, Chile

Dr L. Friberg, Departments of Environmental Hygiene of the Karolinska Institute and of the National Swedish Environment Protection Board, Stockholm, Sweden (*Chairman*)

Professor Dr N. Ishinishi, Department of Hygiene, Faculty of Medicine, Kyushu University, Fukuoka City, Japan (*Vice Chairman*)

Dr C. Maltoni, Institute of oncology, Bologna, Italy<sup>a</sup>

Dr B. Ordóñez, Undersecretary for Environmental Improvement,  
Secretariat for Health and Welfare, Mexico

Professor Dr R. Preussmann, German Cancer Research Center, Institute  
of Toxicology and Chemotherapy, Heidelberg, Federal Republic of  
Germany

Dr G. Samarawickrama, Department of Community Medicine, Faculty of  
Medicine, Peradeniya, Sri Lanka

Dr E. Sandi, Bureau of Chemical Safety, Food Directorate, Health  
Protection Branch, Department of National Health & Welfare,  
Ottawa, Ontario, Canada (*Chairman of Sub group 1*)

Dr G. Pershagen, Department of Environmental Hygiene, Karolinska  
Institute, Stockholm, Sweden (*Rapporteur*)

Ms M. Vahter, Department of Environmental Hygiene, National Swedish  
Environment Protection Board, Stockholm, Sweden (*Rapporteur*)

---

<sup>a</sup> Unable to attend the Task Group meeting.

*Representatives of other organizations*

Dr A. Berlin, Commission of the European Communities, Luxembourg

Dr G. F. Nordberg, Commission of the European Communities, Department  
of Environmental Hygiene, University of Umeå, Umeå, Sweden

Mr C. Satkunananthan, United Nations Environment Programme, Geneva,  
Switzerland

Dr M. Stoeppler, International Union of Pure and Applied Chemistry,  
Institute for Chemistry of the Jülich Nuclear Research Facility  
Ltd, Jülich, Federal Republic of Germany

*Observers*

Mr K. W. Nelson, ASARCO Inc., New York, NY USA (representing the  
International Center of Industry and Environment)

Mr H. Norin, Department of Environmental Hygiene, National Swedish  
Environment Protection Board, Stockholm, Sweden

Dr S.S. Pinto, ASARCO Inc., Tacoma, WA, USA (representing the  
International Center of Industry and Environment)

Dr M. Piscator, Department of Environmental Hygiene, Karolinska  
Institute, Stockholm, Sweden

Mr R. Svedberg, Boliden Metall AB, Skelleftehamn, Sweden

*Secretariat*

Mr G. Ozolins, Associate Manager, Environmental Health Criteria and  
Standards, Division of Environmental Health, World Health  
Organization, Geneva, Switzerland

Mr J. D. Wilbourn, Division of Chemical and Biological Carcinogenesis,  
International Agency for Research on Cancer, Lyons, France

CONSULTATION ON THE PREPARATION OF THE ENVIRONMENTAL HEALTH  
CRITERIA DOCUMENT ON ARSENIC

STOCKHOLM FROM 4 TO 6 OCTOBER 1978

*Participants*

Dr V. Bencko, Department of General and Environmental Hygiene, Medical  
Faculty of Hygiene, Charles University, Prague, Czechoslovakia

Dr A. Berlin, Commission of the European Communities, Luxembourg

Dr B. Fowler, Environmental Toxicology Branch, National Institute of  
Environmental Health Sciences, Research Triangle Park, NC, USA

Dr L. Friberg, Departments of Environmental Hygiene of the Karolinska  
Institute and of the National Environment Protection Board,  
Stockholm, Sweden (*Chairman*)

Dr G. Lunde, Central Institute for Industrial Research, Oslo, Norway

Dr G. F. Nordberg, representative of the Commission of the European  
Communities, Institute of Community Health and Environmental  
Medicine, Odense University, Odense, Denmark

Mr G. Ozolins, Coordinator, Environmental Health Criteria and  
Standards, Division of Environmental Health, World Health  
Organization, Geneva, Switzerland

Dr G. Pershagen, Department of Environmental Hygiene, Karolinska  
Institute, Stockholm, Sweden (*Rapporteur*)

Dr M. Piscator, Department of Environmental Hygiene, Karolinska  
Institute, Stockholm, Sweden

Ms M. Vahter, Department of Environmental Hygiene, National Swedish  
Environment Protection Board, Stockholm, Sweden (*Rapporteur*)

ENVIRONMENTAL HEALTH CRITERIA FOR ARSENIC

Members of the Task Group on Environmental Criteria for Arsenic  
met in Stockholm from 28 January to 1 February 1980. The meeting was  
opened on behalf of the Director-General by Mr G. Ozolins, Associate  
Manager, Environmental Health Criteria and Standards. The Task Group  
reviewed and revised the draft criteria document and made an  
evaluation of the health risks from exposure to arsenic and its
