<b>List of abbreviations</b>	<b>ix</b>
<b>Abstract</b>	<b>xi</b>
<b>1. Introduction</b>	<b>1</b>
1.1 Previous systematic reviews and meta-analyses	2
1.1.1 Melanoma	2
1.1.2 NMSC	4
1.2 Definition of risk factor	6
1.3 Definition of health outcome	7
1.4 Impact of risk factor on health outcome	7
<b>2. Methods</b>	<b>9</b>
2.1 Protocol development	9
2.2 Literature search	9
2.2.1 Electronic bibliographic databases	10
2.2.2 Electronic grey literature databases	10
2.2.3 Internet search engines	10
2.2.4 Organizational websites	10
2.2.5 Hand-searching and expert consultation	10
2.3 Study selection	11
2.4 Eligibility criteria	11
2.4.1 Population	11
2.4.2 Exposure	11
2.4.3 Comparator	12
2.4.4 Health outcomes	13
2.4.5 Study designs	13
2.4.6 Effect measurements	14
2.5 Data extraction	15
2.6 Missing data requests	15
2.7 Risk of bias assessment	15
2.8 Evidence synthesis (including meta-analysis)	16
2.9 Subgroup and sensitivity analyses	17
2.10 Quality of evidence assessment	18
2.11 Strength of evidence assessment	18

<b>3. Results</b>	<b>21</b>
3.1 Study selection	21
3.2 Characteristics of included studies	21
3.2.1 Study type	21
3.2.2 Population	49
3.2.3 Exposure	49
3.2.4 Comparator	50
3.2.5 Health outcomes	50
3.3 Risk of bias within studies	50
3.3.1 Melanoma incidence	50
3.3.2 Melanoma mortality	53
3.3.3 NMSC incidence	55
3.3.4 NMSC mortality	58
3.4 Evidence synthesis	58
3.4.1 Melanoma incidence	58
3.4.2 Melanoma mortality	65
3.4.3 NMSC incidence	66
3.4.4 NMSC mortality	71
3.5 Subgroup analyses	71
3.5.1 Melanoma incidence	71
3.5.2 NMSC incidence	72
3.6 Sensitivity analyses	72
3.6.1 Melanoma incidence	72
3.6.2 NMSC incidence	74
3.7 Quality of evidence	74
3.7.1 Melanoma incidence	74
3.7.2 Melanoma mortality	78
3.7.3 NMSC incidence	78
3.7.4 NMSC mortality	83
3.8 Strength of evidence	83
3.8.1 Melanoma incidence	83
3.8.2 Melanoma mortality	86
3.8.3 NMSC incidence	86
3.8.4 NMSC mortality	87
<b>4. Discussion</b>	<b>89</b>
4.1 Summary of evidence	89
4.2 Comparison with previous systematic review evidence	89
4.2.1 Melanoma	89
4.2.2 NMSC	90

4.3	Limitations of this review	90
4.4	Use of evidence for burden of disease estimation	92
<b>5.</b>	<b>Conclusions</b>	<b>95</b>
<b>6.</b>	<b>Differences between protocol and systematic review</b>	<b>97</b>
	<b>References</b>	<b>99</b>
	<b>Annex 1. Search strategies</b>	<b>109</b>
	<b>Annex 2. Sample of excluded studies</b>	<b>115</b>
	<b>Annex 3. Histology</b>	<b>119</b>
	<b>Annex 4. Description of missing data requested and received</b>	<b>127</b>
	<b>Annex 5. Risk of bias by health outcome</b>	<b>129</b>
	<b>Annex 6. Subgroup analyses</b>	<b>167</b>
	<b>Annex 7. Sensitivity analyses</b>	<b>173</b>

# Acknowledgements

This report presents the findings of the World Health Organization (WHO)/International Labour Organization (ILO) Systematic Review 7 – *The effect of occupational exposure to solar ultraviolet radiation on malignant skin melanoma and non-melanoma skin cancer* (WHO/ILO SR7). WHO wishes to acknowledge the contributions of the many experts who made this systematic review possible.

The following staff of the International Agency for Research on Cancer (IARC), ILO and WHO provided technical contributions to this report, which was prepared under the supervision of WHO: Mathieu Boniol (WHO), Bayan Hosseini (IARC), Ivan Ivanov (WHO), Bálint Náfrádi (ILO), Maria Neira (WHO), Ann Olsson (IARC), Felix Onyije (IARC), Frank Pega (WHO), Joaquim Pintado Nunes (ILO), Annette Prüss-Üstün (WHO), Mary Schubauer-Berigan (IARC), Joachim Schüz (IARC), Yuka Ujita (ILO) and Emilie van Deventer (WHO). Maria Leon-Roux (WHO consultant), Natalie Momen (WHO consultant) and Frank Pega were part of the core drafting team. Frank Pega also coordinated the project and Maria Neira provided overall guidance.

The scope of the systematic review was defined by WHO and ILO, who called on individual experts to express interest in participating in a WHO/ILO working group for the systematic review, selected the experts to participate in the working group and convened the working group. Acknowledgements are due to the following individual experts who participated in the working group between 29 May 2017 and 20 December 2021: Balázs Ádám, Ojochide Akagwu, Issaka Akparibo, Rami Al Rifai, Sholeh Bazrafshan, Giulia Bravo, Fabriziomaria Gobba, Adele Green, Sanja Kezic, Tom Loney, Alberto Modenese, Marilia Paulo, Cheryl Peters, Thomas Tenkate, David Whiteman and Marc Wittlich. Acknowledgements are also due to Swen John, who participated in the working group between 29 May 2017 and 11 December 2019.

External, independent peer review was conducted with three anonymous reviewers, and coordinated by the WHO Department of Quality Assurance of Norms and Standards.

All external participants (i.e. each individual expert in the working group and each peer reviewer) completed the Declaration of Interests for WHO Experts form.

## Funding statement

Financial support for the preparation of this publication was provided by the Centers for Disease Control and Prevention National Institute for Occupational Safety and Health of the United States of America through its cooperative agreement with WHO (Grant 1E11 OH0010676-02; Grant 6NE11OH010461-02-01; and Grant 5NE11OH010461-03-00); the German Federal Ministry of Health (BMG Germany) under the BMG-WHO Collaborative Programme 2020-2023

(WHO specified award reference 70672); and the Spanish Agency for International Cooperation (AECID) (WHO specified award reference 71208). The European Union also provided financial support to the ILO through the Vision Zero Fund (VZF) project on filling data and knowledge gaps on occupational safety and health in global supply chains, which is implemented within the framework of the ILO Flagship Programme “Safety + Health for All”.

Sven John accepted a research grant<sup>1</sup> (through the University of Osnabrück) from the International League of Dermatological Societies registered in the University of Osnabrück’s transparency register as “*Systematic review of the impact of occupation on skin cancer*” and used these funds for work on WHO/ILO SR7.

The contents of this publication are solely the responsibility of WHO and do not necessarily represent the official views of any of WHO’s or ILO’s donors mentioned above.
