[ ENGLISH TEXT – TEXTE ANGLAIS ]

Statute  
of the  
International Renewable  
Energy Agency  
(IRENA)

The *Parties* to this Statute,

*desiring* to promote the widespread and increased adoption and use of renewable energy with a view to sustainable development,

*inspired* by their firm belief in the vast opportunities offered by renewable energy for addressing and gradually alleviating problems of energy security and volatile energy prices,

*convinced* of the major role that renewable energy can play in reducing greenhouse gas concentrations in the atmosphere, thereby contributing to the stabilisation of the climate system, and allowing for a sustainable, secure and gentle transit to a low carbon economy,

*desiring* to foster the positive impact that renewable energy technologies can have on stimulating sustainable economic growth and creating employment,

*motivated* by the huge potential of renewable energy in providing decentralised access to energy, particularly in developing countries, and access to energy for isolated and remote regions and islands,

*concerned* about the serious negative implications that the use of fossil fuels and the inefficient use of traditional biomass can have on health,
